

## Greater Goods Blood Pressure Monitor

The New England Work and Family is committed to providing resources to its members to help you live a healthy, fulfilling life. Tracking and controlling your blood pressure is an essential part of staying healthy. The Greater Goods Blood Pressure Monitor measures systolic and diastolic blood pressure as well as pulse with a single button. An irregular heartbeat sensor alerts you to any issues. The large, inverted, backlit LCD display with oversized numbers makes reading measurements the easiest and the adjustable cuff comfortably fits almost all arm sizes. It's compatible with two users, storing up to 60 measurements for each. The kit includes a durable carrying case, 4 AAA batteries and a wall plug.
